

Dear Pescaviva,

I would like to thank you and everyone at Pescaviva for making fantastic bait. This is my first season river fishing on the River Severn for Barbel. This week I have had some fantastic fishing with the river rising. This was my first experience of the river coming up this high and these conditions have really produced some fantastic fish.

I have had great success fishing in areas of slack water, only a rod length or so out. I caught my first Barbel over 10lbs on your Garlic Corn. I have also had great success using the Trout Pellet Sweetcorn.

With so many bait companies out there, I am glad that I have found one that I have total confidence in and has improved my catch rates. With the river, up and very coloured, I believe that the high levels of attractants in your bait really has made a huge difference.

I look forward to new products, and I am sure that I will continue to catch using your bait range on the Severn.

Thank you and regards,

William Taylor
